

Taber Irrigation District
Temporary Consent to Discharge Pumped Water

In response to Spring 2018 regional overland flooding associated with the MD of Taber and Town of Taber State of Local Emergency, Taber Irrigation District (TID) has obtained an Approval under the Water Act to temporarily accept water ponded in proximity to our open channels and reservoirs. Both canal capacity and water quality are concerns.

Date: _____

Applicant: _____

Location of Ponded Area: _____

Method (e.g. pump/pipe): _____

Point of Discharge to TID Irrigation Works: _____

Conveyance to TID Irrigation Works (direct/other): _____

If Other, List Route and Landowners (e.g. MD Taber East Road Borrow Rge Rd 16-#):

TID hereby grants consent to the Applicant to discharge into open channels, pipe drains or reservoirs of the district (no TID delivery pipelines), under the following conditions:

1. Applicant must submit any third-party consents to the TID office before starting.
2. Applicant must provide nutrient and E. coli tests on request.
3. When setting up, minimize ground disturbance. No "pushing" water to pump - relocate as required. Mitigation (e.g. silt fence, filter material) may be required.
4. Applicant must receive verbal confirmation from District Superintendent Barry Jensen (403-330-1070) before starting pumping.
5. Applicant must notify Barry when pumping completed.
6. Applicant must cease pumping temporarily if requested to do so by TID staff.
7. Flow rate limited to 300 USGPM (\approx 3" pump), unless otherwise stated below.
8. Site specific conditions:

TID Authorized: _____

Date: _____

This consent serves as a Water Conveyance Agreement under 21(2)(b) of the Irrigation Districts Act, RSA 2000 Ch. I-11, authorizing removal of stormwater from an area.
